Professional Summary

Resourceful, detail-oriented, and highly motivated Bachelor of Arts student (Computer Science focus) at Wilfrid Laurier University, eligible for the Canada Summer Jobs (CSJ) program. Seeking an expedited entry into a Web Assistant, Digital Media Coordinator, or Office IT Support position in the GTA (Brampton) or Waterloo area. Features a strong background in web design, SEO optimization, and media operations, demonstrated by building and launching captain-solo.ca—a live interactive digital hub—alongside delivering 1,400+ custom projects with a 4.8/5.0-star freelancer rating. Extremely punctual, adaptive, and ready to contribute immediately.

Core Competencies

Web & Digital Design:	HTML5, CSS3, JavaScript, React, TailwindCSS, Shopify, WordPress, SEO Optimization, Cross-Browser Compatibility, Mobile Responsiveness, Page Speed Optimization
Multimedia Production:	Videography, Video Post-Production (Premiere Pro, DaVinci Resolve), 3D Asset Modeling (Blender), Visual Branding & Assets, Digital File Management
IT & Office Support:	Google Workspace, Microsoft Office (Excel, Word), Device & Router Configurations, Data Archiving & Backup, Local Virtualization (Docker), SQLite
Soft Skills:	High reliability, strict punctuality, client communication, task prioritization, adaptive problem-solving

Featured Projects

captainsolo.ca - Live Interactive Portfolio Hub | React, TailwindCSS, Three.js, GSAP 2025

- Designed and deployed a responsive personal portfolio featuring custom interactive 3D web animations.
- Optimized SEO meta-tags and asset loading (image compression, script minification) to achieve high page-speed scores.

JobScanner Pro - Automated Aggregator & Data Pipeline | Python, Playwright, SQLite, Tkinter 2025

- Built an automated job search scraping tool utilizing Playwright to extract listings from public career boards.
- Integrated SQLite database storage to deduplicate job post entries and manage application statuses.

findYOU - Security-Isolated Local Productivity System | Python, React, SQLite, Docker 2026

- Engineered a local time-management dashboard tracking tasks and system actions using Python and React.
- Containerized the application using Docker to ensure cross-platform runtime reliability and secure isolation.

Light Years - C++20 WebAssembly Space Shooter | C++20, SFML, CMake, Emscripten 2025

- Programmed a 2D shooter game engine in C++20 and compiled to WebAssembly for seamless in-browser execution.
- Implemented optimization design patterns (object pooling, fixed-timestep loop) to minimize runtime performance overhead.

Work Experience

Athletics & Event Production Assistant Aug. 2023 - Apr. 2026

Wilfrid Laurier University Athletics, Waterloo, ON

- Coordinated and produced video coverage for university athletic and recreational events, managing tight schedules.
- Managed digital media databases, organizing and cataloging large video archives for quick retrieval and distribution.
- Operated high-end audio-visual equipment, ensuring professional quality, correct setups, and safety compliance.

Freelance Developer & Creative Producer 2020 - Jan. 2026

Independent Contractor

- Delivered 1,400+ custom digital web assets, design layouts, and media projects for clients globally (4.8/5.0-star rating).
- Managed all customer onboarding, task scoping, budget estimates, and final delivery, generating \$30K+ in freelance revenue.
- Tailored technical solutions to meet diverse client business needs, resolving questions patiently and efficiently.

Education

Computer Science Coursework (General BA Track) Sep. 2021 - Present

Wilfrid Laurier University, Waterloo, ON
