Professional Summary

Multimedia storyteller, tech writer, and Bachelor of Arts student who bridges the gap between deep technical systems and engaging public content. Combining a strong technical background (real-time graphics, WebAssembly, C++) with award-winning 3D animation and professional videography experience. Skilled at scripting, recording voiceovers, producing high-fidelity visual pitches, and explaining complex software concepts to broad audiences.

Core Skills

Media Production:	Videography, Video Editing (Premiere Pro, DaVinci Resolve), Scriptwriting, Storyboarding, Audio Mastering (Waves, iZotope VSTs)
3D Animation & Art:	3D Modeling (Blender), Texturing, Rendering, Real-Time Graphics Visualization
Technical Literacy:	Computer Science Principles, C/C++, WebAssembly, Python, HTML5, CSS3, JavaScript, Technical Documentation
Communication:	Client Relations, Digital Literacy Mentorship, Technical Blogging/Logging, Narrative Development

Media & Editorial Experience

Athletics & Recreation Videographer	Aug. 2023 - Apr. 2026
Wilfrid Laurier University, Waterloo, ON	
- Coordinated and produced video coverage for university athletic programs, handling end-to-end filming, video editing, and digital publishing. - Wrote storyboards and scripts for promotional spots, editing raw event footage into high-pace highlight reels and media packages. - Interviewed athletic coordinators, coaches, and student athletes to produce narrative-driven sports segments.	
Freelance Creative Producer & 3D Artist	2020 - Jan. 2026
Independent Contractor	
- Delivered 1,400+ custom digital media, 3D art, and video projects for global clients, earning a 4.8/5.0-star rating. - Handled all customer-facing communication, translation of technical requests, and storyboard approvals. - Scaled creative freelance operations to over \$30K in revenue, managing brand identity, media archives, and content schedules.	

Projects & Portfolio

Real-Time 3D OpenGL Rendering Engine C++, OpenGL, GLSL, 3D Assets	2025
- Engineered a custom rendering pipeline showing real-time lighting shaders, camera logic, and 3D asset import pipelines. - Produced video walkthroughs and technical tutorials explaining shader pipelines and asset imports for developers.	
Light Years - WebAssembly & C++ Space Shooter C++20, SFML, CMake, Emscripten	2025
- Developed a 2D shooter, compiling a native C++ project to run inside standard web browsers via Emscripten and WebAssembly. - Formulated technical write-ups and storyboard pitches detailing the compilation flow and cross-platform native packaging.	

Education Volunteering

General Bachelor of Arts Student	Sep. 2021 - Present
Wilfrid Laurier University, Waterloo, ON	
Focus: Computer Science coursework, graphics programming, technical writing, and web systems.	
Digital Literacy Mentor & Support	2024 - Present
Community Initiatives	
Conducted weekly group classes explaining digital safety, secure passwords, and software features in clear, simple terms.	

Awards

- Bronze & Silver Medalist - Skills Ontario Competition (3D Animation, Blender), 2018
